

## CowboyStudio Boom Stand Setup Instructions

This document includes step-by-step instructions for setting up one of our boom stands. Your kit should include:

- One (1) stand
- One (1) boom arm
- One (1) sandbags

The exact contents of your kit may vary based upon your order. Refer to Figure 1 for the items included in the instructional kit.

Figure 1

Step 1: Loosen the wing nut at the top of the stand legs by turning counterclockwise as shown in Figure 2. Expand the legs so that the stand will stand up on its own, and then tighten the wing nut.

Step 2: Open the flip locks on the stand joints to allow the stand sections to move freely. Raise and lower the sections of the stand to the desired height, and close the flip locks to hold the sections in place. Refer to Figure 3 for a detailed look at these locks.

Step 3: Turn the handle on the center grip head to loosen the grip head. Adjust the angle of the boom arm to your desired angle, and then retighten the handle on the grip head as shown in Figure 4.

Step 4: Attach the sandbag to the end of the boom arm using the carabineer around the handle of the sandbag as shown in Figure 5.

Step 5: Open the flip locks on the boom arm to allow the arm sections to move freely. Extend the sections of the arm to the desired length, and close the flip locks to hold the sections in place as shown in Figure 6.

Step 6: Remove the tip of the boom arm from the arm by opening the flip lock at the end of the boom arm.

Step 7: Insert the tip into the base of the object you are placing on the end of the boom and tighten the appropriate clamps until the tip is held securely in place.

Step 8: Insert the tip back into the end of the boom arm. Close the flip lock to hold the tip in place.

Your boom arm is now ready for use.

NOTE: Do not place objects that are excessively heavy at the end of the boom arm.
