

CowboyStudio Table Top Lighting Kit Setup Instructions

This document contains step-by-step instructions for setting up one of our table top lighting kits. Your kit should include:

- One (1) photo tent
- Four (4) color backgrounds
- One (1) carrying case for photo tent
- One (1) mini light stand
- One (1) reflector
- One (1) light bulbs

The exact contents of your kit may vary based upon your order. Refer to Figure 1 for the items included in the instructional kit.

Step 1: Remove the photo tent from its carrying case and the protective plastic sleeve.

Step 2: Gently pull the top of the tent up and the bottom of the tent down to cause the tent to open up.

Step 3: Attach one of the colored backgrounds to the inside of the photo tent using the Velcro fasteners.

Your photo tent should now look like that pictured in Figure 2.

Step 4: Loosen the wing nut at the top of the light stand legs by turning counterclockwise as shown in Figure 3. Expand the legs so that the light stand will stand up on its own, and then tighten the wing nut.

Step 5: Open the flip locks on the light stand joints to allow the light stand sections to move freely. Raise and lower the sections of the stand to the desired height, and close the flip locks to hold the sections in place. Refer to Figure 4 for a detailed look at these locks.

At this point, the light should stand on its own at your desired height.

Step 6: Screw the light bulb into the reflector as shown in Figure 5. When done, your light bulb and reflector should match Figure 6.

Step 7: Mount the reflector on the light stand. Start by loosening the screw at the base of the reflector. Slide the reflector onto the tip of the light stand and tighten the screw until the reflector fits securely as shown in Figure 7.

Once assembled, your table top kit should match that in Figure 8.
